

POLITICS OF THE DEVELOPING WORLD *Economics and Politics*

Course contact hours: 45

Recommended credits: 6 ECTS – 3 US

OBJECTIVES

This is an introductory course to the politics of development from a comparative perspective. We will be addressing development issues across different points in time and across different world regions. Two main topics/concepts that will be analyzed throughout the semester are: **development** and the **state**. We will study Latin America, Africa, and Asia, which form part of what is known as the developing world or Third World, a labeling which in fact we will challenge. We will also present a comparative overview of the Latin American, African, and Asian regions in general; and familiarize ourselves with and address the debates surrounding the virtues & vices of market economies (and globalization). A cultural component, (films, related to development politics), will also form part of this course.

REQUIREMENTS

Fluent English

LEARNING OUTCOMES

1. Become familiar with developmental issues (world-wide).
2. Conceptualize development, democracy, the state, and globalization.
3. Familiarize (and apply) the comparative method.
4. Identify (and differentiate) the dependent and independent variables of an argument.
5. Be adept at elaborating written arguments making use of an essay format.
6. Be adept at elaborating oral arguments grounded on analytical frameworks and making use of empirical reality to sustain (and verify) arguments.

TEACHING METHODOLOGY

The course is HEAVILY based on assigned readings and class discussion. There is going to be very little lecture from my part. Students will be responsible for completing the reading assignments for each day of class, participate in class by answering questions posed by the instructor, by raising questions or comments regarding the course's readings, and/or reacting to questions/comments raised by other classmates. In general, students are responsible for ALL the information sources used in this course. Regarding attendance, the instructor will call the same one at the beginning of each class meeting. You are expected to be in class and responsible for everything discussed in class.

Student's evaluation is based on: daily class attendance/participation, three quizzes, three essays, and seven in-class exercises. Below I include a general description of each of the mentioned student's evaluations for this course. Nevertheless, I shall provide a more detailed explanatory document for each of these evaluations as the semester progresses.

ASSESSMENT CRITERIA

In-class Guide Questions' Exercises: 15%
Essays: 30%
Quizzes: 45%
Attendance/Participation: 10%
